LedgerLens Investigation Dossier

Packet: **manipulated** | Documents analysed: 5 | Findings: 8

All documents are synthetic demonstration data. No real PII is used.

Overall assessment: HIGH RISK
Multiple high-confidence inconsistencies were observed across the packet. Refer for manual investigation. Do not auto-approve.

7.1 Document Overview

Document	Type	Source file	Status
Loan Application Form	loan_application	01_loan_application.pdf	Processed
PAN Identity Card	pan_id	02_pan_id.jpg	Processed
Electricity Bill (Address Proof)	address_proof	03_address_proof.pdf	Processed
Salary Slip	salary_slip	04_salary_slip.pdf	Processed
Bank Statement	bank_statement	05_bank_statement.pdf	Processed

7.2 Extracted Information

Loan Application Form

Field	Value	Confidence
full_name	Rohan Mehta	96%
date_of_birth	14-03-1992	96%
pan	AKMPM4821Q	63%
address	48 Camac Street, Kolkata, West Bengal 700017	92%
employer	Nimbus Analytics Pvt Ltd	95%
declared_monthly_income	140000	96%
account_number	50100 2234 7781	96%
loan_amount	1500000	96%
application_date	05-09-2026	96%

PAN Identity Card

Field	Value	Confidence
full_name	Rohan Mehta	95%
date_of_birth	14-03-1990	96%
pan	AKMPM4821Q	88%
id_issue_date	22-07-2027	96%

Electricity Bill (Address Proof)

Field	Value	Confidence
full_name	Rohan Mehta	96%
address	12 Park Street, Kolkata, West Bengal 700016	96%

bill_date	02-09-2026	96%

Salary Slip

Field	Value	Confidence
full_name	Rohan Mehta	96%
pan	AKMPM4821Q	83%
net_pay	86000	96%
gross_earnings	104000	95%
pay_date	31-08-2026	96%
employer	Nimbus Data Labs LLP	95%

Bank Statement

Field	Value	Confidence
full_name	Rohan Mehta	96%
account_number	50100 2234 7781	96%
statement_period	01-08-2026 to 31-08-2026	96%
closing_balance	274960	96%

7.3 Contextual Analysis (within and across documents)

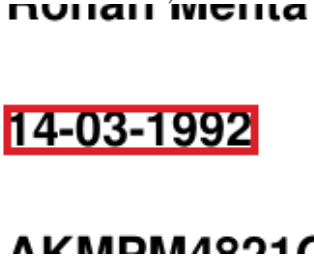

[CRITICAL] XDOC-DATE_OF_BIRTH-1 **Date of Birth conflicts across documents**

Class: Cross-document contextual | High confidence | Observed inconsistency | Documents: Loan Application Form, PAN Identity Card

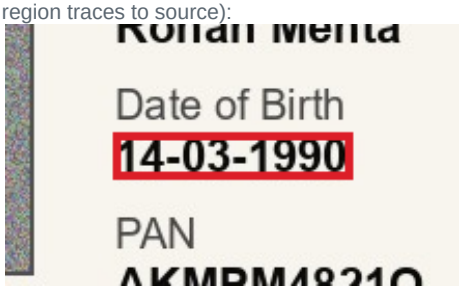

The date of birth does not match across the packet: "14-03-1992" on Loan Application Form; "14-03-1990" on PAN Identity Card. Values for the same applicant entity should be identical across all submitted documents.

Recommended action: Verify the applicant's date of birth against an authoritative source.

Evidence on **Loan Application Form** (highlighted region traces to source):

Evidence on **PAN Identity Card** (highlighted region traces to source):

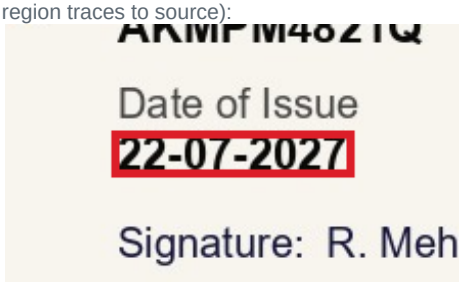

[HIGH] DATE-LOGIC-1 **Identity document issued after the application date**

Class: Cross-document contextual | High confidence | Observed inconsistency | Documents: Loan Application Form, PAN Identity Card

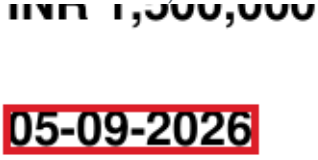

The PAN identity document shows an issue date of 22-07-2027, which is after the application date 05-09-2026. An identity proof cannot be issued after the application that relies on it.

Recommended action: Re-verify the identity document and its issue date.

Evidence on **PAN Identity Card** (highlighted region traces to source):

Evidence on **Loan Application Form** (highlighted region traces to source):

[HIGH] FIN-INCOME-1 **Declared income is not supported by payroll or bank records**

Class: Cross-document contextual | High confidence | Observed inconsistency | Documents: Loan Application Form, Bank Statement, Salary Slip

The application declares a monthly income of INR 140,000, but corroborating documents show INR 86,000 (salary slip net pay); INR 86,000 (bank statement salary credit). Declared income materially exceeds the income evidenced

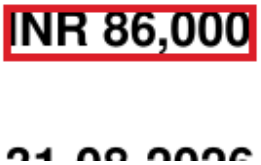

by payroll and bank records.

Recommended action: Confirm actual monthly income from payroll and bank credits before using the declared figure for loan eligibility.

Evidence on **Loan Application Form** (highlighted region traces to source):

Evidence on **Salary Slip** (highlighted region traces to source):

[HIGH] STRUCT-BALANCE-1 Bank statement closing balance does not reconcile

Class: Within-document structural | High confidence | Observed inconsistency | Documents: Bank Statement

The statement prints a closing balance of INR 274,960, but the opening balance plus the sum of the listed transactions comes to INR 179,960. The ledger does not add up, a strong indicator that the closing figure was altered (difference INR 95,000).

Recommended action: Recompute the ledger from the transaction list and obtain a bank-certified statement.

Evidence on **Bank Statement** (highlighted region traces to source):

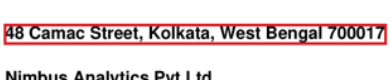

[HIGH] XDOC-ADDRESS-2 Address conflicts across documents

Class: Cross-document contextual | High confidence | Observed inconsistency | Documents: Electricity Bill (Address Proof), Loan Application Form

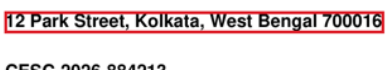

The address does not match across the packet: "48 Camac Street, Kolkata, West Bengal 700017" on Loan Application Form; "12 Park Street, Kolkata, West Bengal 700016" on Electricity Bill (Address Proof). Values for the same applicant entity should be identical across all submitted documents.

Recommended action: Verify the applicant's address against an authoritative source.

Evidence on **Loan Application Form** (highlighted region traces to source):

Evidence on **Electricity Bill (Address Proof)** (highlighted region traces to source):

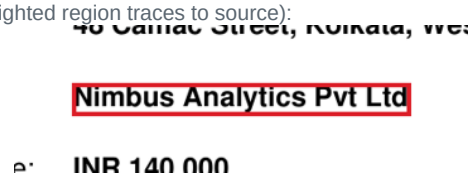

[MEDIUM] XDOC-EMPLOYER-3 Employer conflicts across documents

Class: Cross-document contextual | High confidence | Observed inconsistency | Documents: Loan Application Form, Salary Slip

The employer does not match across the packet: "Nimbus Analytics Pvt Ltd" on Loan Application Form; "Nimbus Data Labs LLP" on Salary Slip. Values for the same applicant entity should be identical across all submitted documents.

Recommended action: Verify the applicant's employer against an authoritative source.

Evidence on **Loan Application Form** (highlighted region traces to source):

Evidence on **Salary Slip** (highlighted region traces to source):

7.4 Visual Forensic Findings

[HIGH] PDF-FORENSIC-bank_statement **Born-digital PDF shows post-authoring modification**

Class: Born-digital PDF forensic | High confidence | Potential manipulation (needs review) | Documents: Bank Statement

Structural analysis of the PDF indicates it was modified after it was first produced: the file contains 1 incremental-update revision(s) appended after the original was written; and the creator ('LedgerLens DemoForms 1.0') and producer ('iText 7.2.5') disagree, which happens when a file is re-saved by a different tool. This is deterministic file-structure evidence, not a visual guess. The content that changed between revisions has been localized on the page. A revision can be benign, so this is flagged for human review.

Recommended action: Obtain the original unmodified PDF directly from the issuer.

Evidence on **Bank Statement** (highlighted region traces to source):

[MEDIUM] VIS-EXIF-id **Image metadata indicates photo-editing software**

Class: Visual forensic | Medium confidence | Potential manipulation (needs review) | Documents: PAN Identity Card

The image's EXIF metadata records editing software ('Adobe Photoshop 25.1 (Windows)'). Identity photos captured by a scanner or camera would not normally carry a photo-editor signature. This is a supporting signal, not proof.

Recommended action: Request the original unedited photograph or a fresh capture.

7.5 Evidence and Traceability

Finding	Document	Evidence	Confidence	Status
XDOC-DATE_OF_BIRTH-1	Loan Application Form	14-03-1992	High confidence	Observed inconsistency
XDOC-DATE_OF_BIRTH-2	PAN Identity Card	14-03-1990	High confidence	Observed inconsistency
DATE-LOGIC-1	PAN Identity Card	22-07-2027	High confidence	Observed inconsistency
DATE-LOGIC-1	Loan Application Form	05-09-2026	High confidence	Observed inconsistency

Finding	Document	Evidence	Confidence	Status
FIN-INCOME-1	Loan Application Form	Declared INR 140,000	High confidence	Observed inconsistency
FIN-INCOME-1	Salary Slip	Net pay INR 86,000	High confidence	Observed inconsistency
PDF-FORENSIC-bank_statement	Bank Statement	Content added after the original revisio	High confidence	Potential manipulation (needs review)
STRUCT-BALANCE-1	Bank Statement	Printed closing INR 274,960	High confidence	Observed inconsistency
XDOC-ADDRESS-2	Loan Application Form	48 Camac Street, Kolkata, West Bengal 70	High confidence	Observed inconsistency
XDOC-ADDRESS-2	Electricity Bill (Address Proof)	12 Park Street, Kolkata, West Bengal 700	High confidence	Observed inconsistency
VIS-EXIF-id	PAN Identity Card	EXIF Software: Adobe Photoshop 25.1 (Wi	Medium confidence	Potential manipulation (needs review)
XDOC-EMPLOYER-3	Loan Application Form	Nimbus Analytics Pvt Ltd	High confidence	Observed inconsistency
XDOC-EMPLOYER-3	Salary Slip	Nimbus Data Labs LLP	High confidence	Observed inconsistency

7.6 Investigation Summary

Verdict: HIGH RISK. Multiple high-confidence inconsistencies were observed across the packet. Refer for manual investigation. Do not auto-approve.

Findings by category: Cross-document contextual: 5, Born-digital PDF forensic: 1, Within-document structural: 1, Visual forensic: 1.

Observation status: 6 observed inconsistencies, 2 potential manipulations, 0 needs-human-review.

Areas requiring additional verification:

• Confirm actual monthly income from payroll and bank credits before using the declared figure for loan eligibility.

• Obtain the original unmodified PDF directly from the issuer.

• Re-verify the identity document and its issue date.

• Recompute the ledger from the transaction list and obtain a bank-certified statement.

• Request the original unedited photograph or a fresh capture.

• Verify the applicant's address against an authoritative source.

• Verify the applicant's date of birth against an authoritative source.

• Verify the applicant's employer against an authoritative source.

Limitations: Findings are investigative signals, not legal determinations of fraud. Visual forensics on documents is unreliable and is reported at low confidence for human review. OCR output is not treated as ground truth. All data here is synthetic.
